GPS Tracking & Fleet Management System

**The Premier Traceability & Accountability
for Auto Finance, Leasing, Rental and Insurance Operations**

Fleet Management

OmaticsGPS Super-Sensitive Intelligent Cloud (SaaS) based Fleet location technology provides everything you need from a GPS real time tracking system. Let's you know the whereabouts of all leased and financed or insured vehicles in your portfolio on the map - virtually anywhere....any time!

Asset Management

Comprehensive Asset management allows record keeping of the vehicle make, model, year, VIN number, registration, insurance dates, etc., include image of the vehicle.

Accidence Management

Online record keeping of the accident including vehicle details, drivers involved, injuries, location and police reporting, repair cost, insurance details, road and weather condition and more....

The system incorporates comprehensive reporting to show replay routes, show distance travelled, overspeed, idle times, exception reporting and many more features.

Available with multiple options, this solution can be configured to meet your specific business needs to assist you in managing your loan or insurance portfolio and protecting your collateral.

Accident Report

Accident	Details	Repair	Details	Other Details
Accident Date/Time		Is asset repairable?		Weather Condition:
Insurance Notified		Who paid repair cost?		
Police Name		Repair Approved by		Witness Name:
Police Badge No		Repair Cost		
Police Report Complete		Repaired Date		Witness Address/Tel No:
Accident Location		Repair Garage		

Solution for Auto Finance, Rental and Insurance Companies allows you to:

- Activate device before vehicle is released.
- Set geofence and receive alerts if vehicle goes out of the defined area.
- Track and display the current location of any vehicle.
- Activate & Deactivate vehicle to assist in collections & recovery.
- Set payment notifications and warning buzzer for late payment.
- Maintenance and renewal notification Alerts
- Asset record and management.
- Accident record and management.

Cost and benefits

Cost of GPS system is built-in at the time of approving vehicle financing and cost of the use is rolled into the loan and customer pays for the technology. Customers who have marginal credit would now be able to get a vehicle credit because of the less risk to the lender. This results in selling more vehicles, thus a huge increase in revenue.

Blocking the ignition allows the vehicle to be recovered at a much lower cost than using traditional methods of searching for a vehicle over an entire city, state or nationwide. It is as simple as locating the vehicle, blocking the ignition and driving right to it.

This provides fleet management a quick and easy tool to ensure customer adherence to terms and conditions of vehicle leased, rented or insured.
